PURPOSE AND SCOPE

An approved revision covering Visitor participation in Survival Mode and block-editing permissions managed by the protection mod.

KEY PROVISIONS

1 | Participation environment

Visitors generally join in Survival Mode. The MJX protection mod restricts block placement, destruction, and changes to city facilities unless management grants permissions in specified areas. An initial allowance is provided when joining.

2 | Ways to earn currency

Visitors may earn coins or points through customer service, driving, guiding, commissioned tasks, shops, selling products, vending machines, events, and competitions. The form of rewards varies by activity.

3 | Ways to spend

Possible uses include MTR fares and passes, road tolls, vehicles, mobility products, eligible equipment, furniture, appliances, food, and property purchase or rental. Some events may allow points to be converted into coins.

Effective-date note

These changes were approved on November 1, 2026, but no effective date has been specified. Earlier guidance should not be interpreted as implementing them immediately.

STATUS AND INTERPRETATION

This revised text has been approved but has no announced effective date. Do not assume it is in force until MJX officially announces its commencement.
